## EDUCATION

Doctor of  
Philosophy  
(Ph.D)

Aug 4, 2014-  
Mar 4, 2020 **IDRBT and University of Hyderabad, India**

Specialization : Computer Science (CS)

Thesis: Reversible data hiding using Prediction error expansion based techniques

Description: Inevitably, Data hiding is used to communicate the secret information through the digital medium. The existing methods in the literature along with Data hiding are not capable of restoring the original medium along with the secreta data. The Reversible Data Hiding (RDH) is the only way of extracting the original medium along with secret data. The Prediction Error Expansion (PEE) is used to obtain the better visual quality of the medium than the other existing methods. Thus, PEE based RDH is only the ultimate solution for the applications where original medium along with secret data is required exactly.
